

# Cheap and effective fluid Bed.

Materials:

Cardboard coffee cups in 2 different sizes, one type with lid

Printer paper 80 g/m<sup>2</sup>

Glue / glue gun.

Aquarium pump

Various aquarium accessories

Start by making a hole for aquarium tubing in the small cup, and glue it.

Cut the bottom out of the big cup and change the bottom out with printer paper

Then it's just putting cups together and provide glue the edges so that it seals

It might be a little unstable, but then glue to the fixed to a wooden board
